

Make A People Paper Chain

Fold a piece of A4 paper in half lengthways and cut along the fold.

You should have a long rectangle of paper.

Fold the strip in half, in half again and in half again (three times altogether) all in the same direction – lengthways. You should now have a small, long rectangle.

Draw half a person as you see in the drawing below. The middle of the person should be on the fold.

Cut out your half person – but don't cut along the fold in the middle of your person.

Open it out and you should have a people paper chain!

Give them features and colour them in – you could even write names on them if you want to.
